

Indigenous Languages and Arts program language centres List

The [Indigenous Languages and Arts \(ILA\) program](#) currently supports a number of organisations, including a network of 21 language centres.

While these language centres are listed here by State, language areas do not align with State borders. As such, some language centres physically located in one State could service areas in another State. To see a map depicting Indigenous language areas see the [AIATSIS map of Indigenous Australia](#).

Note that each of the languages shown here correspond to the relevant language code in the [Australian Indigenous Languages Database \(Austlang\)](#). Through Austlang, you can view more information about the language including its alternate spelling. Access to Austlang is free.
