Short submission (text box 500 words or less)

1. The Current policy and funding settings do not adequately resource the long-term infrastructure required to embed First Nations leadership as core operational practice. Much existing support remains short-term and project-based, limiting continuity, workforce development and long-term cultural impact.
2. Artists remain structurally underpaid and frequently work within insecure conditions despite being central contributors to Australia's cultural and economic life. Without stronger policy intervention, the sector risks continued workforce attrition and reduced artistic sustainability.
