

National Cultural Policy Submission

1472339

Public

Individual

Louie Dowell-Wise

Short submission (text box 500 words or less)

I think the philosophy of cultural policy as art is restrictive, there are many facets of Australian culture that have nothing to do with individual creative expression. I also think emphasising centrality of the artist will further restrict the scope of works, with certain topics becoming unmentionable for fear of retribution. Not only that but many cultural treasures are not the domain of a single creative but a community which does not identify as a 'creator'. Finally your submission system is shit, 7 pages of box checking and giving you personal details and I get a poorly placed mobile text box with the vaguest of context. At least have the relevant information by the submission area
